

Joint EU-US Workshop:

“Future High Power CW RF Sources for Accelerators”

- What will be the long term **future**?
- We expect some inputs from future experience with:
 - **IOT's**: Diamond, Elettra, ...
 - **Solid state** amplifiers: SOLEIL, ?...
 - Will these techniques be applicable to **very high power** ?
 - Or will **klystrons** remain the best choice?
- ESRF proposes a workshop in 1.5 years from now: around March 2005
- Who will be invited?
 - EU, US, ... world wide ?
 - Users & suppliers ?
- Larger size \Rightarrow more formal organization, more costs:
 - Attendance on invitation or open to anybody?
 - Conference fee !
